- Competition Economics

Soft Skills

- Presentation
- Flexible
- Analytical
- Communication
- Economic Problem Solving
- Team Work

Interests

Professional

One of my professional interests is the usage of statistical software such as Python, R, and STATA to perform data analysis techniques. An example of this is the use of Python to perform applied economic analysis, an illustration of this can be found on my personal website.

Personal

My personal interests include running, squashing, and closely following Formula 1 racing.
